## NOTICE !

### Ratepayers M.D. Inga No. 520:

The Bank is insisting on a reduction of our Municipal and School Loans.

The only way the Municipality can meet this demand is by the collection of taxes, especially arrears.

Unless the arrears of taxes are paid within the next two weeks, the District will have no other alternative than to enforce the provisions of the Tax Recovery Act.

E. H. PIDGEON,

Secretary-Treasurer

M. D. of Inga No. 520.

### Mr. Goebel Buried.

The funeral took place on Friday last of the late Conrad Goebel, who had passed away at an early hour Wednesday morning, after a lingering illness. A service was held at the house by Rev G Poetzsch, pastor of Immanuel Lutheran church at Rosenthal; another service was held in Immanuel church; following which interment took place in the church yard.

Deceased was born in Alexanderdorf, Russia, October 3d, 1865. On Jan. 20, 1885, he married Anna Stettinger, and in May 1892 they came to Stony Plain district. Ever since he has resided in the Rosenthal district.

He is survived by his wife; 5 sons—John, George, Henry, William and Samuel; and 5 daughters—Elizabeth, Katherine, Ernestine, Anna, Christine; all married except Henry and Samuel; and one brother Henry Goebel, Calgary.

John Armbruster, of Stony Plain, had charge of the funeral arrangements.

### Doings at M. D. Convention.

At the annual convention in Edmonton last week of the delegates to the Alberta Municipal Districts convention, a resolution proposing a county system for Alberta met with much opposition from a number of delegates. On a vote being taken, the proposition was given a year's hoist.

The delegates turned down the resolution which proposed imposing a provincial mill tax.

In another resolution, which carried, they called upon the Provincial government to bear the whole cost of maintaining indigents.

Relief for settlers in dried-out areas, and extension of the old age pension act to apply to aged people from other countries, were also approved.

### Auction Sale Extraordinary.

The outstanding farm sale of the season will be that of Mr Nick Bauer which takes place next Wednesday, Dec 2d. There will be offered 14 head of stock, a large assortment of farm machinery, and a threshing outfit. There will be no reserve whatever on what is offered. Mr and Mrs Nick Bauer are moving to the Coast on the suggestion of their medical adviser, and will probably take up their residence in the suburbs of Vancouver.

### Benj. Lawton Passes Away

The Provincial Game Commissioner, Mr Benjamin Lawton, died at his residence in Strathcona on Friday last, as the result of a paralytic stroke suffered at his home three days previous. Mr Lawton had been in the service of the Provincial Government since 1905. The funeral took place on Monday, at which old friends of Mr Lawton's in this district were present.

"Fresh from the gardens"

### Don't Attempt Too Much

In these days everybody is, or at least should be, learning some valuable lessons in the economics of business and work which should assist him in the years to come. The experiences of today are, undoubtedly, revealing to some people just where they made mistakes in the past, mistakes which had they been avoided would not have landed them some of their difficulties of the present. Countless thousands of people are being compelled to make drastic retrenchments in the conduct of their business, living expenses, etc., which would not have been so necessary had reasonable retrenchment been made in years gone by and a curb placed upon the satisfaction of their desires. Many people are saying "Never again" will they be caught doing what they formerly and mistakenly did do.

The varying detail of the great lesson which experience is teaching us cannot be discussed in one article or possibly in one hundred articles. But in reading a recent magazine article, dealing with the life experiences of one man in which that man told of an incident happening when he was six years old, and which he considers the most important lesson he ever learned, in school or out, the thought presents itself that in this new Western country perhaps a goodly number of people have made the mistake which this man so early in life learned to avoid. At all events the incident is, we believe, worth repeating inasmuch as it carries its own interpretation.

The now extremely powerful man to whom reference is made was set to work by his father thinning out the growing peaches from trees that were too heavily laden. The boy protested to his father that he did not see any sense in so doing, and asked: "Why not let them all grow and have more peaches?" "All right," replied the father, "We'll try it both ways. One tree we won't touch at all. That'll be your tree. The other tree we'll thin out so that the only peaches left will be at least six inches apart. That'll be my tree. And we'll see what'll happen." The boy, now grown to successful manhood, says he watched the fruit grow and ripen and at last the fruit was ready to pick. "My tree," he says, "yielded about six bushels of runty little culls. And my father's tree yielded more than eight bushels of fine, large peaches. All because he had thinned out the load on his tree and left mine to struggle with more than it could handle."

And all that this wise father said to his boy: "Trees are a lot like people. If you want to get good work out of them, you have to find out how much work they can handle well. Then give them that much work to do. If you try to work them too hard, you'll spread their energy all along the line and give you second-rate results."

The question is: Have not too many of us here in the West spread ourselves out too much, instead of confining ourselves to the main job? In an intense desire, a laudable ambition, to get on, have we not attempted too much, dissipated our energies over too great an area instead of giving greater application to fewer things and making them truly successful? For example, have not many of us yielded to the very natural temptation to acquire more land than we can successfully cultivate, rather than be content to work to its capacity the old original quarter or half section? Would we not be better off today had we resisted that temptation to spread out, to take on too much?

And is not this simple illustration of increase of acres acquired, this spreading out of our energies which such increase entailed, merely an illustration after all of other tendencies in our life which, when the first check comes, or difficulties arise, land us in trouble beyond our capacity to handle?

Each man doing his own particular job and doing it well, rather than attempting several jobs and doing all of them in an inferior way, is the sound, safe way—the way which, in the long run, achieves the largest measure of success.

#### Clause Again In Use

#### War In Manchuria Boosts Insurance Rates For Pacific Shipping

War insurance rates are now being quoted by companies dealing with Pacific shipping, it is announced.

Although the war clause has been in all insurance policies it has been inactive since the end of the Great War. When that conflict broke out the war risk rate to the Orient was as high as 2½ per cent. owing to the presence on the Pacific of German raiders.

The insurance companies announce that war insurance will be applied on cargo from Hong Kong northward, the scale increasing in proportion to the rate of possible risk. Hong Kong is lowest, with approximately 1-10 of one per cent. Premiums further north the rate jumps, approaching a full one per cent. for Harbin, where actual hostilities affect freight movements.

Basic economic conditions in Japan are reported to be improving.

#### Heads Welfare Agency

#### Hon. T. A. Creer To Direct New Organization In Winnipeg

Hon. T. A. Creer, former Dominion Minister of Agriculture and Minister of Railways and Canals, heads a new organization of Winnipeg social agencies called the Greater Winnipeg Welfare Committee. Under Mr. Creer's direction representatives of some 100 social organizations will work for the betterment of conditions among the unemployed of the city and surrounding municipalities. Schemes to provide employment, recreation and entertainment will be viewed to keeping up the morale of the workless men and women will be inaugurated by the committee.

Nearly 100,000 people in the Barcelona district of Spain are working in textile mills.

The woman always pays—if her husband doesn't forget to give her the money.

### So Short Of Breath Would Have To Sit Down

Mr. C. M. Stroder, Hanover, Ont., writes: "I could hardly do my work, and after going up or down stairs I had to sit or lie down for a while as I would be all out of breath."

I could hardly go down town for I walked two or three blocks I was down to fall over.

I took several boxes of Milburn's Heart and Nerve Pills and am glad to say I have been totally relieved of my trouble."

Sold at all druggists and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Price 50c a box

#### Showed Originality

#### Illinois Woman Accused Of Singing Insults At Neighbor

Mrs. Elfreda Dohring of Evanston, Illinois, says she doesn't like to be insulted in the key of "F" or any other musical scale.

So she went before Police Magistrate Harry H. Porter and swore out a warrant for her neighbor, Mrs. Pearl C. Dorband, saying that for two years Mrs. Dorband has been singing insults at her from her back porch.

Sometimes, she said, the insults were by implication in popular songs and sometimes Mrs. Dorband "just made up her own songs."

#### FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hem; and as the skirt had been turned under was darker than the rest. I redyed the entire dress, after having bleached the goods following directions in the Diamond Dyes package."

I used Diamond Dyes for the redyeing, of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors—fast to wash and to rub. I think my things are new when I redye or tint them with Diamond Dyes. They do give the most gorgeous colors!"

Mrs. G.C. Lewis, Quebec.

#### International Bridge

#### Four Players On Ocean Liner Spoke Different Language

During an ocean voyage four passengers made up a game of bridge. One was a German, one an Englishman, one a Portuguese, and the fourth a Frenchman. Not one of them could speak the language of the others. Fortunately, an interpreter was able to speak all four tongues was available and he stood by and interpreted each call trilingually. The game went quite well. Incidentally, the obliging and talented interpreter was a Pole by birth, though of German nationality by adoption.

**Cause Of Asthma.** No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain, and various other irritants may set up a trouble impossible to eradicate except through a pure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding the remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

#### Palm Prints As Detectors

#### Just As Infallible As Finger Prints Opinion Of Inspector

Palm-prints as opposed to finger-prints were used for the first time in a court of law when a prisoner pleaded guilty at the Old Bailey to house-breaking and shop-breakings. The Recorder asked whether palm-prints were as infallible as finger-prints. Detective-Inspector Cherrill said the matter had been studied by Scotland Yard for some time, "the conclusion being in the affirmative."

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

#### A Glass Of Cold Milk

School days are milky days and rightly so, because no other food is so refreshing, healthful and nourishing as milk. When the boy or girl comes home from school at four o'clock they are hungry and tired and the wise mother knows that a glass of milk is the most healthful and easily prepared food she can provide. The four o'clock glass of milk should be part of the school-day programme.

—Department of Agriculture, Ottawa.

#### Already Dead

A certain Missouri editor refuses to publish obituary notices of people who, while living, failed to subscribe to his newspaper, and gives this pointed reason:—"People who do not take their home town paper are dead anyway, and their passing away has no news value."

W. N. U. 1917

#### Another Triumph Of Electricity

#### Pulsametric Electrical Systems Now In Use On Most Liners

Ever since John Harrison produced in 1765 the first marine chronometer, the science of keeping time on board ships at sea has become more and more accurate, until today, the average ocean passenger liner has at its disposal the combined knowledge of the world's observatories transmitted by wireless and recorded by electric clocks. There is, in fact, no excuse for being late nowadays aboard ship.

In the old days the chronometer served within a varying degree of accuracy to acquaint a captain with the time of the day or night, which he checked with the aid of observations on the sun and stars. Since the introduction of wireless telegraphy, it has been possible to keep a check on the chronometer of which every well-found ship carries three. Each is specially constructed to remain level when the ship is pitching and rolling, and is contained in a glass case maintaining an even temperature. In spite of this, there are always slight errors which are journalized. "Time is checked from time-signals sent out from some forty different observatories all over the world, the signals being a broadcast of actual ticks of the observatory chronometer, over a period of five minutes," says Commander J. G. Bisset, R.N.R., in his fascinating book "Ship Ahoy!"

"As a result of all these facilities for checking the chronometer, the average ship nowadays only carries two instead of three, and at the most two. The idea of carrying three before the days of wireless was so that one could be checked against the other, and in the event of a slight change of rate in any of them the two that synchronized could be taken as being in all probability correct."

How are ship's passengers to know the time so accurately obtained by the navigating officers on the bridge? Various means have been used, but the most modern system, known as "Pulsyn-etc," is probably the best yet devised. By this system all the clocks in the ship's public rooms, engine rooms, offices, etc., are controlled electrically by a master clock usually located in the chart-room. The master clock is a strong time transmitter operated by a balance wheel (a pendulum being obviously impossible on board a ship at sea).

As the ship sails east or west into a different meridian the time is of course, advanced or retarded. The "Pulsyn-etc" impulse transmitter is fitted with an operating key-lever and a dial engraved with minutes, so that all the clocks on the circuit are automatically altered as desired. This system is now in general use on most Cunard steamers including the "A" ships. The passenger, warned by notice boards of the intended retarding or advance of time each night, and armed with the correct time electrically transmitted simultaneously to all parts of the ship, has little excuse for being late for meals, dances, games, or a score of other engagements which modern ship-life makes possible today.

#### Testing Waters Of Ganges

#### Scientists Find Bacteria Which Kill Many Diseases eGrrms

The belief of the Hindus that the waters of the Ganges have special life-giving properties has received confirmation from science. Experiments by scientists have shown that Ganges water contains bacteria, which are able to attack and kill—the germs of a number of diseases. The School of Tropical Medicine in Calcutta has been investigating these helpful bacteria, and it is hoped that cultures of them may be obtained which will be of use in fighting disease.

For treatment of caked bugs in cows, or garget, use Douglas's Egyptian Liniment—the quick, sure remedy. Saves time and expense. Prevents blemished stock.

#### Will Use Saskatchewan Coal

Contracts awarded by the Manitoba Government for heating buildings owned by the province this winter call for coal mined in Western Canada. Hon. W. J. Chubb, Minister of Public Works, has been investigating these helpful bacteria, and it is hoped that cultures of them may be obtained which will be of use in fighting disease. Saves time and expense. Prevents blemished stock.

## BABY'S COLDS

Never "dose" except on doctor's advice

rub on VICKS VapoRub

BEST FOR ADULTS, TOO

#### A Debatable Question

#### Bill Drafted In Old Country To Make Voluntary Euthanasia Legal

The Medical Officer of Health for Leicester has drafted a bill to make voluntary euthanasia legal. The subject is far too important to be thrust on one side by the political controversies of the moment, and though, of course, the bill in question stands not the smallest chance of passage into law at present, and will very likely never even be introduced, it ought at least to stimulate a serious discussion of a problem far too long deliberately side-tracked. The proposal that a person suffering from an incurable and acutely painful disease should be permitted, after legal authorization based on the most exhaustive examination of the case, to pass peacefully into life at his own desire raises fundamental issues in the fields of law, of medicine and of religion. Reasoned objections and traditional prejudices will be ranged against it. There are few who would care to pronounce dogmatically either against the proposal or for it without prolonged and anxious reflection. But Dr. Millard, by once more giving the idea of euthanasia concrete form, has made it certain that the subject will be seriously explored.—London Spectator, London, England.

**Regulate On The Farm.**—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Conductor—"Flurry up there—these people want to get on."

"Timid Passenger—"Yes it's all right for you, you're only thinking of your jolly old bus—I'm thinking of my bag of eggs."

About 500,000 letters are carried by air mail in the United States every day.

## ACID STOMACH

EXCESS acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. Harmless and tasteless, and yet its action is quick. You will never rely on crude methods, once you learn how quickly this method acts. Be sure to get the genuine.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth paste that safeguards against acid-mouth. (Made in Canada.)

## Interesting Theory Is Held That Lunar Cycles And Sun Spots Have A Definite Effect On Weather

Foresters and hunters returning from the foothill district south and west of Edmonton report this year a tremendous increase in the number of field mice. Colonies of these little animals have reached such proportions that in some areas they are blamed with undermining large trees, leaving them with severed roots and little foothold in the earth. In some instances it is stated that large trees have fallen in quite gentle winds. While experienced foresters doubt if the mice can be held responsible for felling timber, pointing out that many of the trees in the affected district are "over-mature" and likely to crash, they do agree that the mice are more plentiful. This they ascribe to the "cycle." Dr. Rowan of the university has, by observation, fixed this as recurring every four years. Rabbits, as is well-known, become plentiful every nine years, even to the point of over-running whole districts, only to die off again in large numbers in the cycle's progression.

Scientists have been studying these strange cycles of abundant yield. Only last summer a conference was held in the forests of Quebec, attended by experts from many countries. Attempts to connect the phenomenon with the eleven-and-one-half year sun spot cycle seem to have been abandoned as a result of the information there exchanged. Many animals follow the nine-year cycle. Every nine or ten years there is recorded a tremendous increase in their numbers, and then, just as suddenly, there comes disease and they die by the million.

Generally speaking, it was found that about every four years there were times of abundant productivity in plant and animal life covering most of the North American continent. The increase or decrease in the animal life was found to begin in the far north and to work its way southward and northward, reaching southeastern Canada after three years or so. Some most interesting curves were presented by Dr. Ralph E. Delury, assistant director of the Dominion observatory at Ottawa. He pointed out that the cycle of nine and a half years is but little longer than the lunar circle of 8.85 years and almost exactly half of another lunar cycle of 18.6 years. These two cycles of tidal activity may influence climate by stirring up ocean to the surface and thus influence waters, allowing cold layers to come atmospheric pressure and storm areas. Dr. Ellsworth Huntington supplied significant support for this lunar cycle of droughts and agricultural productivity in the United States, with a period of 18.6 years when measured by the five cycles between 1837 and 1930. During the same time there have been six financial panics separated by five normal periods each of 18.4.

In his paper, Dr. Delury suggested that there are three influences controlling these cycles—a sunspot cycle of 11.2 years average and the two lunar cycles already referred to. He stated also that the yearly deviation of the earth's axis and its yearly revolution about the sun would provide a definite rhythm in life and climate. But even yet scientists are not ready to accept any explanation of cycles as final. They have been known and studied for hundreds of years. There was a cyclic law promulgated in India many centuries ago. Possibly in a few more centuries all cycles may be charted, their cause definitely discovered. Once that is done, predicting the future will be routine—but even then it is doubtful if all men will be ready to meet the rainy day.—Edmonton Journal.

"Waiter, bring me another steak, this knife won't cut."—Buen Humor, Madrid.

W. N. U. 1917

### Place Men On Farms

#### Saskatchewan Government Has Plan To Assist Unemployed

Plans for the placing of single unemployed men on farms in the drought areas of Saskatchewan, under the government assistance scheme, have been adopted, according to Hon. J. A. Merkle, Minister of Railways, Labor and Industries.

Under this plan, provision is made for the government paying the men \$5 per month allowance and the farmer \$10 per month, in certain cases. Payment of such sums are governed by special circumstances.

According to department officials, approximately 1,000 applications have already been received, and they are arriving daily at the rate of nearly 200.

The scheme is instituted with a two-fold purpose; first, of supplying needy farmers in the dried-out areas with necessary help and, secondly, to obtain employment for qualified farm laborers at present unemployed in the urban centres of the province.

Regulations for the placing of single unemployed girls on farms on a plan somewhat similar to those adopted for the placing of men are being prepared.

#### A Famous Bird

Daniel McCann, last survivor of the proud scimitar which raised a young eagle into perhaps the most famous bird in American history, was buried recently at Eau Claire, Wis. McCann, 77 years old, helped care for "Old Abe," the Civil War eagle that P. T. Barnum tried to buy for \$20,000, until its death.

#### Bill Boards For Air Tourists

The billboard curse has taken to the air after having adopted all of the scenery along the country's highways. A sign has been erected near the airport at Tulsa, Oklahoma, which is so constructed that plane passengers can read its advertising message from the sky.

### Geologists Find Traces Of Wealth

#### Report Following Field Work Survey Will Be Interesting

Field work in connection with the geological survey service of Canada is over for the year, all parties having returned to Ottawa to prepare their reports. Additional information respecting the vast stores of Canada's unexploited mineral wealth will follow from these compilations, several of the groups having devoted themselves to the acquisition of data in that connection.

In northeastern Manitoba geological conditions of an area several hundred square miles in extent in the Oxford Lake district are declared to be favorable for gold prospecting. Dr. F. F. Wright carried out the survey in this region.

Keen search for new sources of this metal is in progress in British Columbia. Dr. G. Hanson and Dr. H. C. Gunnung conducted the operations on the Pacific Coast and report increasing production from places.

Geographical and geological exploration of a large area of sedimentary and volcanic rocks near Rankin Bay, on the west coast of Hudson Bay, engaged the attention of Dr. L. U. Weeks. Observation flights over the whole area were made by airplane in addition to numerous canoe trips. At the close of the season the party was conveyed from Rankin Bay to Churchill, whence it returned to Ottawa.

### Coal For Wheat

#### Proposal That Canada Buy British Coal On Barter Basis

Lord Gainsford, former president of the Federation of British Industries, stated recently that he contemplated the day when Canada might buy British coal in exchange for wheat on a barter basis.

He advocated the adoption of barter between Great Britain and Canada as a means of short-circuiting difficulties arising out of currency complications and suggested Canada might import British coal on this basis rather than take 16,000,000 tons annually from the United States.

An anthropological laboratory costing \$500,000 was recently opened in Santa Fe, N.M., to study the early days of mankind.

## Back To The Land Movement Has Reached Heavy Volume During The Past Two Years

Springing out of a desire to return to the land, the back-to-the-farm movement in Canada has attained such volume that, in the past two years, more than 43,000 persons have been transferred from city to country.

The movement has been singularly steady ever since the industrial depression became severe. It is not the result of government propaganda, of any campaign to "influence" city unemployed in favor of agriculture. In every case, the request for transfer has come from the individual.

No pressure is being exerted from Ottawa to stimulate the movement and no financial assistance is being given.

Federal officials believe that what has happened is this—thousands of farm boys and farmers left their farms in the years of prosperity to go to the cities, work in industry, enjoy the bright lights. The depression has taught them that farm life has its peculiar advantages and they are eager to return. The government is trying to make the task easy and is meeting with tremendous success.

The 40,000 odd who have been located are spread fairly uniformly across the Dominion. They comprise 3,500 men with families and 25,000 single men. The general direction of the movement is vested in the colonization branch of the Immigration Department. Immediately the demand arose, the department invited the two railway companies, both large land owners, to co-operate.

Heat expanded one of the New York City bridges so much, on one August day this past summer, that the bridge could not be closed for an hour and 20 minutes.

An organ with a bronze keyboard and silver pipes was found not long ago at the site of the Roman city Aquilinum, and is believed to date from the third century B.C.

The land officials of the railways, together with the field force of the land settlement board, made careful surveys of rural Canada to discover farmers who desired a hired man, and farms that were for sale. The railways had many saleable farm properties, as had the settlement board.

The business of connecting the city unemployed with the desired rural location then began. Single men were found positions with farmers, and, wherever possible, were placed under contract for one year.

Married men were found farms close to the cities in which they lived, and within their means. Long term payments at low interest also were arranged.

It was found that thousands of married men, unemployed and with little hope of employment, are not penniless. They have savings of from \$200 to \$500, sometimes more, and this is sufficient to make a small payment and leave something for the initial expenses.

So general is the desire of unemployed to go on the land, that many agencies outside the three mentioned, are becoming active. Some effort will be made to bring these agencies under central direction in the immediate future. This will prevent duplication of work and will ensure uniformity of treatment. The view prevails at Ottawa that the soundest policy is one which refuses all subsidies or financial aid. In this way, those placed on farms are believed to have a better chance of permanent success.

Hubby — "Another new dress! Where am I to get the money to pay for it?"

Wife—"I don't know. I'm your wife, not your financial adviser."

Chlorine was discovered in 1774, by Carl Wilhelm Scheele, a Swedish scientist, when he poured concentrated hydrochloric acid upon manganese dioxide.

## CELEBRATING THE NEW RELATIONSHIPS BETWEEN TWO SISTER DOMINIONS

To celebrate the inauguration of the new trade treaty between Canada and Australia, hailed as a prelude to more and far-reaching intra-Empire agreements, a goodwill cargo of Australian products were shipped to Canada and return cargoes of Canadian goods are now on the high seas en route to the Antipodes. Australian shipments for the west, in part, reached Montreal by S.S. Canadiana Constructor and came on by express freighter to Toronto for rail transhipment. Three hundred business men, provincial officials including representatives from the western provinces met the S.S. City of Toronto of Canadian Steamship Lines when she reached the Ontario city and Australian colours flew for the first time in a Great Lakes port.

Photos show: Top left, a group of the welcoming delegation including L. R. MacGregor, Australian Trade Commissioner to Canada; Hon. Leopold MacAuley for Ontario; T. A. Enderby, General Manager, Canada Steamship Lines; Brig-Gen. J. G. Langton and A. E. Hyland, heading the visiting Australian Goodwill Delegation; top right, Mr. MacGregor presents the first sample of Australian pineapple to H. C. Groat, Toronto Board of Trade, with H. E. Laffer, representative of Australian viticulture and N. W. VanWyck, C.S.L. Freight Traffic Manager, in the background; lower left: one of the pair of young kangaroos aboard the vessel; lower right: S.S. City of Toronto on arrival with the first load of produce coming off—Canada Steamship Lines Photographs.

Alberta Einstein will go to the United States soon to resume his studies at Mt. Wilson Observatory.

Canada still ranks third as a supplier of butter to Japan, the Dominion supplying 140,226 pounds valued at \$52,000 in 1930.

About 16 unemployed men have been sent to Churchill to supplement the skeleton force as caretakers and watchmen this winter.

Dedication of the proposed international peace garden in Manitoba and North Dakota, will probably take place in July, 1932.

Tests of Alberta coal to ascertain the possibility of obtaining petroleum from the product have been completed by Dr. E. H. Bommer, of the University of Alberta.

A committee of Chinese residents in Victoria state that all their dealings with Japanese in Vancouver to the extent of \$300,000 has been boycotted.

Mrs. Thomas A. Edison, widow of the inventor, has approved a plan for a \$150,000 world memorial to her late husband.

Fifty million dollars, needed to keep South Africa on the gold standard, will be raised through London by the Union Government and commercial banks in co-operation.

Peru has informed the League of Nations that it accepted the one-year armaments building holiday proposed by the League. This brings the number of adherents to 40.

The great Yukon River stopped running on November 17, with the temperature at 27 below zero. The main river and all tributaries are frozen over solid, to remain so until next May.

The Isle of Man has made known its desire to adopt a national flag and the governor has been asked to take steps to procure the assent of the British Government. The only Maun flag which now approaches a national stature is a red ensign bearing three human legs.

## Frequent Coal Mine Accidents

Take Lives Of 100 Men Monthly In United States

Too much important news is in the air for many of us to pay attention to the burial of six more coal miners in a gas explosion near Wilkesbarre, Pa. Four were dead when rescuers reached them, and only two were saved.

Despite safety campaigns, more than 100 men are being killed every month in American coal mines. Coal mine accidents killed 107 men in September, 112 men in August and in the first nine months of 1931, the toll was 1,079 miners.

For every million tons of soft coal mined three miners must give their lives, for every million tons of anthracite six must die.

## Pre-Winter Fire Prevention Drive

Hon. J. F. Bryant Issues Appeal To Residents Of Saskatchewan

Making a final drive to stir Saskatchewan residents to concerted pre-winter, fire prevention activities, in order that premium rates on fire insurance might be reduced, Hon. J. F. Bryant, K.C., Minister in charge of fire prevention in Saskatchewan, has issued the following appeal to the general public:

"In view of the large increase in the number of fires in Saskatchewan, and the fact that the high premium rates on fire insurance are the result of past experience in the matter of fire losses, where the lack of care of the many adds to the burden borne by all who insure their property against loss by fire, I venture once again to suggest to the householders of Saskatchewan the desirability of checking up once more on the heating systems before the winter season sets in, in order to assist in keeping down the fire losses in Saskatchewan during the winter months.

"A survey recently conducted by the Wisconsin Industrial Commission discloses the fact that approximately one-fourth of the State's losses of \$10,000,000 per year was due to heating plant defects and neglects. Defective chimneys, burning out of unclean chimneys, woodwork embedded into or in contact with chimney walls, rusted stove pipes, pipes too near unprotected woodwork, and placing of ashes in cardboard or wooden containers, were the main causes of this needless loss.

"A few minutes' attention to removing these causes, and a few cents spent on new stove pipes, or on asbestos or zinc protection when the stove or furnace is near the woodwork, will save many Saskatchewan homes this winter. One Saskatchewan home was burnt down every day last year. See that your home does not go next!"

## Recipes For This Week

(By Betty Barclay)

## SNOW-WHIRL CHOCOLATE ROLL

(4 eggs)

- 6 tablespoons special cake flour, sifted.
- 6 tablespoons cocoa.
- 1/2 teaspoon baking powder.
- 1/2 teaspoon salt.
- 1/2 cup sifted sugar.
- 4 egg whites, stiffly beaten.
- 4 egg yolks, beaten until thick and lemon-colored.
- 1 teaspoon vanilla.

Sift flour once, measure, add cocoa, baking powder, and salt and sift together three times. Fold sugar gradually into egg whites. Fold in egg yolks and vanilla. Fold in flour gradually. Pour into pan, 8 1/2 x 13 1/2 inches, lined with greased paper, and bake in hot oven (400 degrees Fahrenheit) 13 minutes. Turn from pan at once onto cloth covered with powdered sugar. Remove paper. Quickly cut off crisp edges of cake. Spread seven-minute frosting over cake and roll. Wrap in cloth until cool. Cover with an uncooked chocolate frosting.

## TOASTED COCONUT SQUARES

- 1 loaf white bread.
  - 1 1/2 cups sweetened condensed milk.
  - 1 can coconut, southern style.
- Cut bread into 2-inch squares, 1/4-inch thick. Dip each square in milk and drain slightly. Then dip in coconut covering all sides well. Bake in moderate oven (325 degrees Fahrenheit) 25 minutes, or until golden brown. Makes 3 1/2 dozen squares.

## Grading Helps Exports

Standardized Grading Of Eggs Has Been Of Great Benefit

Dependable quality is an advantage in the export market. During the past year, from October 1930 to October this year, exports of eggs from Halifax to Bermuda have held steady despite the advantages of lower prices enjoyed by competing export product. This is a fine indication of the value of standardized grading for eggs and also of the beneficial of government inspection of export eggs. Canadian exporters have secured the confidence of the Bermuda market in the quality of their product and the reliability of our grades. The same is true with respect to the export of eggs to Newfoundland, where quality is winning confidence, with the result that important new markets for Canadian eggs are developing.

CONSTIPATION  
Banished for 20 Years

No one could have had more experience of constipation than this man. His method of correcting this trouble would surely put right anybody who suffers in a similar way.

Paul, K.C., Minister in charge of my 49th birthday and have used Kruschen Salts for many years. As a boy and youth I suffered at frequent times agonies from constipation. This was, after a time, somewhat relieved by a special pill compounded to a prescription, but which, at times, had a weakening effect. On someone's recommendation I tried a bottle of Kruschen Salts, and since then—a matter of at least 20 years ago—have used nothing else. My daily dose I take in hot water at 7:45 a.m.

—E. A. D.

The six salts in Kruschen are Nature's own prescription for keeping the organs of elimination working properly—gently but surely expelling all poisonous waste matter every day. Start on "the little daily dose" of Kruschen to-morrow and so the first step along the royal road to perfect health.

## Winter Cruises To Sunny South

Intiguing Programme Of Sallings Arranged By The Cunard Line

An extensive winter cruise programme of twenty-seven cruises, including ten "Millionaire" cruises to the West Indies, eight to ten days in duration; eleven cruises to the West Indies varying in length from four to twenty-three days; four cruises to the Mediterranean; one cruise to Mexico and South America and a cruise around the world, is announced for the Cunard Line by Arthur B. Macpherson, general manager of the Cunard Line in Canada.

The "Franconia" will set sail on her annual around the world cruise on January 8th, returning to New York on March 27th after having visited a large number of ports never visited by any other world-cruising liner.

Four cruises to the Mediterranean are scheduled commencing with the sailing of the "Mauretania" from New York on December 18th. She will be followed in January by the "Transylvania." On February 4th, and March 6th, the "Aquitania" will make two cruises to the Mediterranean from New York.

The "Samaria" will make the Mexico-South America cruise of fifty-seven days, and passengers will find "57 varieties" of new scenes and sights on this cruise. The "Samaria" will sail on February 6th.

The West Indies cruises will be carried by the "Mauretania," "Franconia," "Aquitania," "Scythia," "California" and "Berenaria," commencing with the sailing of the "Mauretania" on November 18th and finishing with the "Scythia" when she sails from New York on April 16th. The "Millionaire" cruises will be handled by the "Transylvania" and the "Caledonia." Both these ships will make the first of the cruises on December 24th and the "Caledonia" will make the last on April 22nd.

Besides, all these cruises a regular weekly service will be maintained between New York and Bermuda with a call at Nassau by the "Scythia," "Carinthia," and "Caledonia."

The gigantic cruise programme indicates the trend of the times for short holidays in the winter time to the sunny climes of the south and the bookings already indicate a most successful season.

## Nothing Doing

Macpherson was changing his boarding-house, and when he arrived at the new one the landlady showed him to his room.

"Looks comfortable," said Macpherson.

"Yes," went on the woman, "most people admit I've made them comfortable here. I've always had a gift for doing that."

"Is that so?" asked Macpherson, doubtfully. "Well, ye needna' expect one frae me."

## for COUGHS

Take half a teaspoonful of this Minard's Inhalant. Also rub it well into the throat.

## SUNDAY SCHOOL LESSON

NOVEMBER 29

## PAUL'S LETTER TO PHILEMON

Golden Text: "There can be neither bond nor free . . . for ye are all one man in Christ Jesus."—Galatians 3, 28.

Lesson: Philemon.

Devotional Reading: 1 John 4:7-13.

## Explanations and Comments

The Introduction To The Letter, verses 1-3. This letter was sent to Philemon by the hand of Onesimus, who was going to Colossae and Laodicea with other letters from Paul to the other churches there. Timothy was with Paul and joined him, as prisoner of Christ Jesus. Paul writes, in sending greeting to Philemon, and to Apphia and Archippus, presumably Philemon's wife and son, and to the church that met in his house.

Thanksgiving For Philemon's Faith, Love and Service, verses 4-7.—Philemon was a man of means, possibly one of the converts of Paul during his stay in Ephesus, and was greatly esteemed and tenderly loved by the apostle because of the way Philemon used his wealth and influence. His home was the meeting place of the church in Colossae. Paul in his dispirited mood had been greatly heartened and refreshed by reports of his ministries of love to the Christians in Ephesus. Paul tells Philemon of this, and of his prayer and praise to God because of him.

"Hearing of thy love, and of the faith which thou hast toward the Lord Jesus Christ, Paul the apostle, and Timotheus the fellow-worker, have arranged may have been intentional, and the apostle meant to suggest that at the heart of Philemon's love to the saints was his faith in the Lord Jesus: that the source and fountain of his philanthropy was his religion, and that without religion there would have been no philanthropy at all—it was born of his religion and grew out of his religion. The reason for his lavish kindness to the saints was that the love of Christ constrained him."—J. D. Jones.

"The designation of Philemon as fellow-worker may imply some actual co-operation at a former time. But more probably the phrase, like the similar one in the next verse, our fellow-soldier, is but Paul's gracefully affectionate way of lifting these good people's humble work out of its narrowness by associating it with his own. They in their little sphere, and he in his wider, were workers at the same task. All who toil for furtherance of Christ's Kingdom, however widely they may be parted by time or distance, are fellow-workers."—The Expositor's Bible.

## Trying New Phone Service

A new telephone service on trial in Holland permits from three to six persons to talk with each other over a telephone at one time. The new service is finding a wide use in commercial and public quarters, where conferences can be held and agreements arrived at without going from the office.

The normal yield of an acre of figs, the root of which takes 5 or 6 years to mature, is 2,000 pounds, valued at \$25,000.

## Dirigible Scrapped

Disassembled R-100 Being Sold For Scrap Metal

The dirigible R-100 is being sold for scrap metal, the British Air Ministry has announced.

The R-100 cost more than \$2,000,000. What she is bringing was not disclosed.

The dirigible made only one notable flight, from England to Canada in the summer of 1930.

Ever since the R-101 disaster over France, October 5, 1930, in which almost 50 persons were killed, there has been agitation against the use of dirigibles in the air force. Several times the question came up in the House of Commons.

When Viscount Philip Snowden, who was recently raised to the peerage, introduced his last budget, he announced that the R-100 would have to go. Economy was the reason. Only the motors and fabric will be retained.

The dirigible was completed November 28, 1929. Aside from her Canadian trip she made few trips except on test journeys over England.

Mistress: "I'd like to give you a good reference but you have never been punctual with the meals."

Maid: "Well say: 'She prepared the meals with as much punctuality as she received her wages.'"

## Lovely Skin

Vegetable Pills Did What Creams Couldn't

"I find (writes Miss E. T. Clapham) that Carter's Little Liver Pills will do more to keep the complexion clear and the skin free from blemishes than all the face creams I have used."

Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGITABLE and have a definite, valuable tonic action upon the liver. They end Constipation, Indigestion, Bilelessness, Headaches, Acidity, All druggists. 25c and 75c red packages.

## EMPIRE GOODS TO BE EXEMPT UNDER NEW LAW

London, Eng.—Canadian goods will not be taxed under the National Government's anti-dumping legislation. This was made clear in the House of Commons when the resolution, conferring sweeping powers upon the President of the Board of Trade, passed through both stages.

The resolution would grant to the President of the Board of Trade power to impose a maximum duty of one hundred per cent. on a long list of products. But L. Hore-Belisha, Parliamentary secretary for the Board of Trade, explained no Canadian or other Dominion products would be affected. "The Dominions are to have a preference," he asserted amid cheers, "and it is to be one of one hundred per cent."

There would be no cause for complaint concerning the treatment of Dominion products, said the Parliamentary Secretary.

Charles Williams, Conservative, introduced an amendment which would provide that duties against British Empire products would not exceed two-thirds of the rates imposed by similar foreign products. This would represent, he explained, a preference of one-third for the Dominions but, at the same time, he hoped the Government would announce empire goods would be excluded entirely from the scope of the legislation.

There was need for no alarm, replied Mr. Hore-Belisha. "I have already made the declaration, and I make it again, that no duties which are empire products will be chargeable for duty under the bill." The Williams' amendment then was withdrawn.

The measure was an emergency one, members of the Government frankly admitted, designed to meet abnormal conditions. In advancing it both stages at the one sitting, the House disregarded its usual procedure, but "ordinary procedure would take a fortnight," it was pointed out by Rt. Hon. Walter Runciman, president of the Board of Trade, as the House agreed to speed up its routine.

## Davison Again Calgary Mayor

Defeats Communist Opposition Candidate By Huge Majority

Calgary, Alberta—Mayor Andy Davison was carried on an avalanche of independent votes into the majority chair here for the next two years. Phil Luck, Communist, lone opponent to challenge the mayor's right to a second term, lost out in every section of the city.

Final result of the vote, heaviest in the history of the city, was Davison, 17,324; Luck, 1,028; majority for Davison, 16,296. The total vote was 18,352, which was approximately 4,000 more than the ballots cast in the civic election last year.

## Would Stop Gas Waste

Oil Company Declines To Accept Government Conservation Policy

Edmonton, Alberta—The Imperial Oil Company has declined to accept the agreement for the conservation of gas in Turner Valley as proposed by the Provincial Government's advisory committee, Premier Brownlee announced, following lengthy two-day conferences during the past two days with Vice-President A. M. McQueen and officials of the company.

Premier Brownlee added that the Government would immediately consult its technical advisors and stated he was determined to use every possible means to stop the waste of gas in the valley.

## U.S. Team Wins

Toronto, Ont.—Riding faultlessly, a crack team of United States army officers swept the opening event of the Royal Winter Fair Horse Show, placing one, two and three in the individual open events, and winning the first two places of the team jumping contests. More than 11,000 persons watched the show, featured by the international contest between British, Irish, French, Canadian and United States army representatives.

W. N. U. 1917

## Honors Go To Alberta

Exhibitors Of Reward Wheat Score At Royal Winter Fair

Toronto, Ont.—Leading honors in the spring wheat classes at the Royal Winter Fair went to Alberta. The first six placings except fourth, out of nine prizes went to exhibitors from that province. This is the most important event in the seed department of this show and really represents the wheat championship class for Canada. There were over 70 entries this year and all wins were made on the outstanding variety, "Reward," a wheat originated by the Dominion Experimental Farms. The winners were: Eddie J. Shank, Alhambra, first; J. H. B. Smith, Pincher Creek, second; William Taylor, Grand Prairie, third; George Canfield, Wild Rose, Sask., fourth; Fred Paverly, Wembley, sixth; Harman Treble, Wembley, sixth; Alex Paul, Dauphin, Man., seventh; A. Anderson, Swan River, Man., eighth; and Leslie Bartlett, Vauxhall, Alberta, ninth.

## Trade Policy Suggested

U.S. Senator Would Welcome One Mutually Beneficial

Ottawa, Ont.—"Canada has been the best customer for United States products; and I should be very glad to see a policy pursued mutually beneficial for both countries and which would increase the trade between Canada and the United States." So stated Hon. W. H. King, Democratic United States Senator from Utah, and prominent member of the finance committee of the United States Senate. Senator King is a member of the United States Congressional Party visiting Canada under the aegis of William Randolph Hearst, publisher, to investigate the Canadian sales tax system.

## Labor Minister Takes Rest

Senator Robertson Advised To Enter Hospital For Short Time

Ottawa, Ont.—Hon. G. D. Robertson, Minister of Labor, has been advised to go to hospital for a short time before leaving Ottawa on a trip. Senator Robertson, who has been carrying a very heavy load for the past year or more because of the unemployment situation, is in a run-down condition. He had planned to go away for a trip but his physician advised him to go to the hospital for a while first.

During the absence of Senator Robertson, Hon. H. A. Stewart, Minister of Public Works, will be acting Minister of Labor.

## No Foundation For Report

Government Not Prohibiting Importation Of Natural Gas Into Canada

Ottawa, Ont.—As far as can be learned here there is no present basis for the report appearing in an Eastern Canadian financial paper that the Dominion Government proposes to prohibit the importation of natural gas into Canada.

No recent move has been made in that direction. During the debate on the budget at the last session, suggestions were made that such action be taken. They did not receive very serious consideration and since then the matter has not been under review.

## Reports Conditions In England Better

Recent Election Was Marvellous Opinion Of J. P. Morgan

New York, N.Y.—J. P. Morgan unexpectedly broke his usual silence upon his return from Europe to observe that "things are looking a good deal better in England."

In response to a question: "How are conditions in England?" he said: "It was a marvellous election and it looks as if the Nationalist Government will be in for a long time."

## Germany's Crop Above Average

Berlin, Germany—Germany's grain production for 1931 includes 3,660,000 tons of winter wheat and 564,000 tons of summer wheat, said its final crop report. The wheat crop exceeds that of last year by 440,000 tons and is 30 per cent. above the average for the last seven years.

Italy has ruled that all flour made in the country must contain 95 per cent. Italian wheat.

## EMPIRE BROADCASTING

Right Hon. J. H. Whitley, Chairman of the British Broadcasting Company, announces that a station is under construction which the whole British Empire may listen. Several wave lengths will be used in order to provide the best reception under varying conditions.

## Liberals Win Seat

Ontario By-Election Is Won By Opposition Candidate

Guelph, Ont.—Carrying a constituency that has been Conservative, with but one exception, since 1902, Paul Munro, Liberal, was elected to the Ontario Legislature for the riding of South Wellington. His majority over W. P. Gamble, Conservative, was 258. The vote was: Munro, 7,209; Gamble, 701.

The by-election was necessitated by the death a short time ago of Hon. Lincoln Goldie, former provincial secretary in the Ferguson Government. Mitchell F. Hepburn, M.P., Provincial Liberal Leader, said the result was significant of public opinion throughout the province.

The result of the by-election leaves the party standing in the legislature as follows: Conservatives, 88; Liberals, 15; Progressives, five; Independent Conservatives, two; U.F.O., one; Labor, one.

## Borden Issues Warning

Says If Boom Created It Might Have Disastrous Reaction

Montreal, Que.—While there were signs of improved feeling in the business world, Rt. Hon. Sir Robert Borden, president of Barclays Bank (Canada), in addressing the fourth annual meeting of the shareholders here, cautioned against the use of this change in general feeling for the purpose of creating a "boom" which might have a disastrous reaction. The board of directors were re-elected, and Sir Robert Borden was re-elected president and Arthur B. Purvis, vice-president.

## ENGLAND'S PROUD LITTLE MISS STEPS OUT

Here is the most popular little girl in the British Empire, Princess "Lilybeth" with her Mummy and Dad, the Duke and Duchess of York, entering the tiny church at Epscombe Parish, England, to attend the wedding of Lady May Cambridge. The little Princess was a flower girl.

## Study Agricultural Problems

Delegates From Alberta To Attend Meeting In Toronto

Edmonton, Alberta—Prominent Alberta agriculturists, headed by Premier J. E. Brownlee, will attend a meeting in Toronto on December 27 which has been called by the Canadian Chamber of Commerce for the purpose of discussing possibilities of the formation of a Canadian institute of agriculture.

The functions of the proposed institute would include a thorough and continuous study of agricultural problems and of marketing possibilities in Canada and other countries, and the dissemination of information as to quantity, quality and sales requirements of these individual markets. Besides Premier Brownlee, who will deliver one of the three keynote addresses, the Alberta party attending the conference will include: H. A. Craig, Deputy Minister of Agriculture; Senator D. E. Riley, High River; E. W. Jones, Superintendent of Agriculture for the Canadian Pacific Railway at Calgary.

## Girl Wins Scientific Honors

Astronomer At Harvard Observatory Awarded Henry Draper Medal

New Haven, Conn.—Development of a girlhood fascination for gazing at stars from the attic window of her Dover, Del., home, led Miss Armstrong to win one of the highest scientific honors here.

She was presented with the Henry Draper medal by the National Academy of Sciences, the first woman to win this award for scientific achievement.

Miss Cannon is an astronomer at Harvard Observatory. She has catalogued more than 300,000 stars. The meaning of this may be understood by recalling that all the seeming myriads of visible stars number only about 5,000.

## Britain Pays Debts

Bank Of England Makes Full Payment To United States

New York, N.Y.—The Herald-Tribune said the Bank of England was entirely out of debt to the federal reserve system of the United States on October 31, "having apparently paid off every dollar of the \$125,000,000 credit which fell due on that day."

The Herald-Tribune says this fact is disclosed in the federal reserve board's current monthly review, released for publication.

## Postpones Return To India

London, Eng.—Mahatma Gandhi decided to postpone his departure for India following a conference with Prime Minister Ramsay MacDonald. The announcement gave rise to the hope that the failure of the second round table conference on Indian affairs may still be averted.

## OTTAWA EXTENDS WARM WELCOME TO U.S. VISITORS

Ottawa, Ontario—Canada officially welcomed the United States Congressional Party studying the Dominion sales tax system at a banquet tendered here by the Canadian Government.

From Rt. Hon. Sir George Perley, acting Prime Minister, and Hon. E. B. Ryckman, Minister of National Revenue, who is actively assisting the American party in its enquiry, came the warmest words of greeting, friendship and assurances of co-operation. And by Hon. T. P. Gore, beloved senator from Oklahoma, afflicted with blindness nearly half a century ago, words of appreciation and international goodwill were expressed.

"We in Canada are here as interpreters between Great Britain and the United States," Sir George Perley declared. "No duty could be more pleasant or more important than a task of interpreter; because I believe that with the British Empire and the United States holding together we can accomplish anything we like for peace and happiness in the world."

A strong belief in the Canadian sales tax system was indicated by Mr. Ryckman. "The nation that has a deficit unprovided for is not a nation that can hold up its head among the nations of the world," the Minister of National Revenue declared.

"Destiny has established Canada and the United States as neighbors," Senator Gore stated. "We are destined to be as permanent neighbors for ever and a day. We are destined to be neighbors as long as the grass grows, and as long as the water flows. We would not slip that golden chain or break that bondage of friendship."

The dinner tendered by the Government concluded the first day of the stay in the capital of the Congressional Party who visited Canada under the auspices of William Randolph Hearst, publisher. All members of the Dominion cabinet in Ottawa, were at the head table with the United States Minister and leading members of the visiting party.

## Farm and Labor Party

Single Government For Three Prairie Provinces Is Advocated

Brandon, Man.—Single government for the three prairie provinces should be sought by united efforts of farm and labor organizations in the west, advises A. J. Macaulay, president of United Farmers of Canada (Saskatchewan section). He told the convention of United Farmers of Manitoba that prairie government was costing entirely too much.

Leader of the 30,000 members farm body which recently decided to step into politics, Mr. Macaulay said farmers of Saskatchewan believe they could co-operate with the Independent Labor Party on an economic policy aimed at bettering conditions for farmer and workers.

"It is time we got down to real economic issues," Mr. Macaulay counselled. "We must avoid slippery politics and endeavour to do the things that are the best for the west. Political parties are controlled by campaign funds. There is every possibility of a conference in the near future of agriculturists representing the area from Quebec to the Pacific Coast to set up a national fiscal policy designed to aid agriculture."

## Royal Winter Fair

New Record Is Established For Number Of Exhibits

Toronto, Ont.—A new record has been set by the Royal Winter Fair in the number of exhibits for this, its tenth year. An estimate of the number of animals and birds follows:

Horses, 1,000; cattle, 4,400; swine, 1,000; sheep, 600; cats, 250; dogs, 600; poultry and pet stock, 7,500.

The entries from all classes total 18,500 which is a new high mark.

## May Increase Gasoline Tax

Quebec, Que.—Prediction that all Canadian provinces would increase their gasoline tax this year was made by Premier L. A. Taschereau, at a delegation representing provincial automobile associations which protested against a rumored increase in this province.

### Scott—Maier.

The marriage of Mr George Walter Scott, son of Mr. and Mrs T R Scott, Holborn, and Leone E. Maier, daughter of Mr and Mrs Frank Maier, of Holborn, took place in Edmonton, Wed. Nov. 18th, at Alberta College, the Rev F S McCall officiating.

A few relatives and friends witnessed the ceremony, then proceeded to the home of Mr and Mrs Donald Smith, 96th St., where a lovely wedding supper was served by Mrs Smith.

The happy couple spent a few days in the City before returning to Mr Scott's home at Holborn, where they will be at home to their many friends.

Members of the U.F.W.A and U.F.A and neighbors and friends gathered at the home of the bride's parents where they were visiting Sunday evening and gave them a surprise shower of many beautiful and useful gifts, and extended best wishes for a long and happy married life.

### Stony Plain and District

The death occurred in Vancouver last week of Andy Witherspoon, well known here, he having been for some time in the employ of a local butcher. The funeral took place on Saturday in Edmonton, and was attended by several of his friends from Stony Plain. He is survived by his wife and infant daughter.

EGGS WANTED at the Royal Cafe; best prices paid.

Waltham League choir concert, Stony Plain Nov. 27; Garden Valley Nov. 26.

### Deer Winked at Driver.

While Mr Fred L. Elsie, the hotelkeeper at Evansburg, was motoring to Edmonton at an early hour on Monday morning, he saw a large buck on the highway near Seba. The deer, which was one of the largest bucks Mr Elsie had ever seen, calmly stood on the roadway until the car was almost on him, and then winking at the driver of the car, the buck gave a flip of its tail and disappeared in the brush.

### On Abolition of 5c. Bonus

Recently a movement has been started to secure abolition of the 5c a bu. given by the Federal Govt. on wheat delivered to primary markets of the prairie provinces. It now appears that the Financial Post of Toronto is one of the ringleaders in this attempt. The Post, which considers itself the mouthpiece of the industrial East, has always been opposed to the granting of any concessions to the West. That newspaper was, and is the bitterest enemy of the agrarian movement in Western Canada, and has ruthlessly fought the Wheat Pool at every turn of the road. It is a consistent supporter of the private elevator system.

The Alberta Wheat Pool voices a strenuous protest to any suggestion of eliminating the 5c bonus. While it is true those unfortunate farmers who have very little or no crops are discriminated against, at the same time the payment provides a little extra financial assistance to a large proportion of wheat growers at a time when it is badly needed—The U.F.A.

### Ladies' Curling Club Officers

The members of Ladies' curling club met Wed. Nov. 18, for the election of officers and skips for the coming season. Following is the result of the election:

Pres, Mrs R A Walton  
V-pres, Mrs J H Lory  
Sec-treas. — Miss Mabelle Clarke.

Executive—Mesdames Lewis, Yeats, Walton.

Skips—Mesdames H Oppertshauer, O G Wudel, J H Lory, R A Walton.

Curling every Tuesday and Friday at 2.30 p.m.

Fees for the season \$2.50 each.

### Railway Time Table

Going West—Every morning at 11.44.

Going East—Every afternoon at 3.44.

### Samples of Grain Rushed Overseas.

Samples of western Canada's 1931 crop were recently rushed to Atlantic seaboard over C.N.Rys., en route to the various grain markets of the world. More than a thousand of the small bags of wheat were billed to grain exchanges and grain trade associations in Scotland, England, Ireland, France, Belgium, Italy, Holland, Germany.

Made up annually by Western Grain Standards committee in Winnipeg, the samples contain grain from practically every district in the West, and give a fair indication of the quality of wheat which Europe in consumers may expect in the filing of large orders.

Before shipment is authorized, each sample must be analyzed and approved.

### GOVERNMENT OF THE DOMINION OF CANADA

## National Service Loan

The Minister of Finance offers for public subscription

\$150,000,000

### Dominion of Canada 5% Bonds

Bearing interest from 15th November, 1931, and offered in two maturities (the choice of which is optional with the subscriber) as follows:

5 YEAR 5% BONDS, DUE 15th NOVEMBER, 1936

10 YEAR 5% BONDS, DUE 15th NOVEMBER, 1941

Principal payable without charge, in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa or at the office of the Assistant Receiver General at Halifax, Saint John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable half-yearly, 15th May and 15th November, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

### Denominations:

5 YEAR BONDS \$100, \$500 and \$1,000  
10 YEAR BONDS \$500 and \$1,000

The proceeds of this loan will be used to promote the economic and financial welfare of Canada

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

Bearer bonds with coupons will be issued in denominations of \$100, \$500 and \$1,000 in the case of the 5-year bonds and in denominations of \$500 and \$1,000 in the case of the 10-year bonds. These bonds may be registered as to principal.

Fully registered bonds, the interest on which is payable direct to the owner by Government cheque,

will be issued in denominations of \$500, \$1,000, \$5,000, \$10,000 and \$100,000.

Pending preparation of the engraved definitive bonds, bearer interim certificates in denominations of \$100 (for the 5-year bonds only), \$500, \$1,000, \$10,000 and \$100,000, will be delivered on all allotments on subscriptions to this loan. Registration as to principal, or as to both principal and interest, will be effected when the interim certificates are exchanged for definitive bonds, on or about the 1st March, 1932.

ISSUE PRICE: 5 Year Bonds, 99¼ and accrued interest  
10 Year Bonds, 99 and accrued interest

Payment to be made in full at time of application

Subscription lists to the foregoing will open on 23rd November, 1931, and will close on or before 12th December, 1931, with or without notice, at the discretion of the Minister of Finance. Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by recognized Dealers. Interim Certificates will be delivered through the bank or dealer designated by the subscriber in the application, upon surrender of the receipt.

## THE HOUSE OF DREAMS-COME-TRUE

— BY —  
MARGARET FIEDLER

Author of  
"The Splendid Folly," "The Hermit  
Of Fox Island,"  
Hodder & Stoughton, Ltd., London.

### CHAPTER VI.—Continued.

"You know perfectly well what I meant," she answered, a tremor born of anger and wounded feeling in her voice. "You thought I was inquisitive—trying to find out your name—"

"Well—humorously—'you were, weren't you?' Then, as her lip quivered sensitively, 'Ah! Forgive me for teasing you! And—more earnestly—'forgive me for not telling you my name. It is better—much better—that you should not know. Remember, we can only have this one day together; we're just 'ships that pass.'"

He paused, then added: "Mind's only a battered old bulk—a derelict vessel. And derelicts are best forgotten."

There was an unrecurrent of deep sadness in his voice, the steadfast, submissive sadness of a man who has long ago substituted endurance for revolt.

"Remember, we can only have this one day together." The quiet utterance of the words struck Jean into a realization of their significance, and suddenly she was conscious that the knowledge that this unknown Englishman was going away—going out of her life as abruptly as he had come into it—filled her with a quite disproportionate sense of regret.

She found herself unexpectedly up against the recognition of the fact that she would miss him—that she would like to see him again.

"Then—you want me to forget?" she asked rather wistfully.

Her eyes fell away from his as she spoke.

"Yes," he returned gravely. "Just that. I want you to forget."

"And—and you?" The words seemed dragged from her without her own volition.

"I? Oh!" he laughed a little. "I'm afraid I'm inconsistent. I'm going to ask you to give me something I can remember. That'll even matters up if you forget and I remember."

"What do you want me to give you?"

He made a sudden step towards her. "I want you to dance with me—just once. Will you?"—intently.

## BABY FRETFUL, RESTLESS?

### Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no narcotics. It is so mild and gentle you can give it to a young infant to relieve colic. Yet it is as effective for older children. Castoria's regulative help will bring relaxed comfort and restful sleep to your baby. Keep a bottle on hand. Genuine Castoria always has the name: *Dr. J. C. Fiedler*

**CASTORIA**  
CHILDREN EXY FOR

W. N. U. 1917

He waited for her reply, his keen, compelling glance fixed on her face. Then, as though he read his answer there, he stepped to her side and held out his arm.

"Come," he said.

Almost as if she were in a dream, Jean laid her hand lightly on his sleeve and he pulled aside the portiere for her to pass through. Then, putting his arm about her, he swung her out on to the smooth floor of the "salon."

They danced almost in silence. Somehow the customary small-change of ballroom conversation would have seemed irrelevant and apart. This dance—the Englishman had implied as much—was in the nature of a farewell. It was the end of their stolen day.

The band was playing "Valse Triste," that unearthly, infinitely sad vision of Schubert's and the music seemed to hold all the "strange, breathless ecstasy, the regret and foreboding of approaching end of which this first, and last, dance was compact."

It was over at last. The three final chords of the "Valse"—inexorable Death knocking at the door—dropped into silence, and with the end of the dance upon the eager hum of gay young voices, as the couples drifted out from the "salon" in search of the buffet or of secluded corners in which to "sit out" the interval, according as the spirit moved them.

Jean and her partner, making their way through the throng, encountered Madame de Varigny on the arm of a handsome Bedouin Arab. "For the fraction of a second her eyes rested curiously on Jean's partner, and a gleam of something that seemed like triumph flickered across her face. But it was gone in an instant, and, murmuring some commonplace to Jean, she passed on."

"Who was that?"

The Englishman rapped out the question harshly, and Jean was struck by an unaccounted note in his voice. It held apprehension, distaste; she could not quite analyze the quality.

"The Cleopatra, do you mean?" she said. "That was my chaperon, the Comtesse de Varigny. Why do you ask?"

He gave a short, relieved laugh. "No particular reason," he returned with some constraint. "She reminded me—extraordinarily—of someone I used to know, that's all. Even the timbre of her voice was similar. It startled me for a moment."

He dismissed the matter with apparent indifference, and led Jean again into the same little alcove in which he had found her. They stood together silently in the dim, rose-hued twilight diffused by the shaded lamp above.

"Well," he said at last, slowly, reluctantly. "So this is really the end of our stolen day."

Jean's hands, hanging loosely clasped in front of her, suddenly tightened their grip of each other. She felt herself struggling in the press of new and incomprehensible emotions. A voice within her was crying out rebelliously: "Why? Why must it be the end? Why not—other days?"

Pride alone kept her silent. It was his choice, his decision, that they were not to meet again, and if he could so composedly define the limits of their acquaintance, she was far too sensitively proud to utter a word of protest. After all, he was only the comrade of a day. How—why should it matter to her whether he stayed or went?

"I always believe"—the Englishman was speaking again, his eyes bent on hers—"I always believe that, no matter how sad or tragic people's lives may be, God invariably gives them one magic moment—so that they may believe in heaven. . . . I have had mine today."

"Don't you—believe in heaven?" He laid his hands lightly on her shoulders.

"I do now. I believe . . . in a heaven that is out of my reach." His hands slipped upward from her shoulders, cupping her face, and for a moment he held her so, staring down at her with grave, inscrutable

eyes. Then stooping his head, he kissed her lips.

"Good-bye, little comrade," he said unevenly. "Thank you for my magic moment."

He turned away sharply. She heard his step, followed by the quick, jarring rattle of brass rings jerked violently along the curtain-pole, and a moment later he was gone. With a dull sense of finality she watched the heavy folds of the portiere swing sullenly back into their place.

### CHAPTER VII.

#### Which Deals With Reflections

The dawn of a new day possesses a curious potency of readjustment. It is as though Dame Nature, like some automatic old nurse, wakes us up and washes and dresses our minds afresh for us each morning, so that they come to the renewed consideration of the affairs of life freed from the influences and emotions which were clogging their pores when we went asleep. Not infrequently, in the course of this species of mental ablution, a good deal of the glamour which invested the doings of the previous day gets scrubbed off, and a new and not altogether pleasing aspect of affairs presents itself.

It was somewhat Jean's experience when she woke on the morning following that of the fancy-dress ball. Looking back upon the events of the previous day, it seemed to her newly-awakened mind almost incredible that they should have occurred. It was like a dream—life itself tricked out in fancy dress.

Stripped of the glamour of romance and adventure with which the unknown Englishman had clothed his words, the whole episode of the day together presented itself as disagreeably open to criticism, and the memory of that final scene in the alcove set the blood flying to her cheeks. She asked herself in mute amazement: how it was possible that such a thing should have happened to her,—to "our chaste Diana," as her father used laughingly to call her in recognition of the instinctive little air of aloofness with which she had been wont to keep men at a distance.

Of course, the Englishman had taken her by surprise, but Jean was too honest, even in her dealings with her past, to shelve behind this excuse. She knew that she had yielded to his kiss—and knew, too, that the bare memory of it sent her heart throbbing in an inexplicable tumult of emotion.

The stolen day, that day embarked upon so unconcernedly, in a gay spirit of adventure, had flamed up at its ending into something altogether different from the light-hearted companionship with which it had begun.

Then her conscience, recreated and vigorous from its morning toilet, presented another facet of the affair for her inspection. With officious detail it marshalled the whole series of events before her, dwelling particularly on the fact that, with but very slight demur, she had consented to abrogate the accepted conventions of her class—conventions designed to safeguard people from just such consequences as had ensued—and winding up triumphantly with the scoldery that although, like most men in similar circumstances, the Englishman had not scrupled to avail himself of the advantages the occasion offered, he had probably none the less, thought rather cheaply of her for permitting him to do so.

To Be Continued.

### Heads Are Larger

London Hatter Says Seven and Half Now Normal Size

A London West End hatter states that hats have been demanded larger in size during recent years. He was unable to explain the phenomenon. If anyone had asked for size 7½ a few years ago it would have been a special order. But today the big head is quite normal, and it is necessary to have 7½ in every style of hat, ready made or on the shelves.

#### For a Starter

"How is my daughter getting on? Do you think she will make a great singer?"

"It is very hard to say."  
"But surely she possesses some of the qualifications?"  
"Well—she's got a mouth, certainly!"

Due to the long hours of sunshine, combined with high altitude and cool air, so part of the world is more suitable for sun treatments and sunshine clinics than Canada.

## Harsh, Gripping Purgatives Are Dangerous!

Cheap, harsh laxatives may prove very costly. Painful troubles are often aggravated by the unnatural gripping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

### An Interesting Exhibit

Thuringia Princess Spent Thirty Years Completing Collection Of Dolls

At Arnstadt, in Thuringia, an exhibition unique in its way is attracting hundreds of admiring spectators. It is the collection of dolls which was once the hobby of a princess. Early in the eighteenth century Princess Augusta Dorothea of Schwarzburg-Arnstadt spent thirty years making the collection complete. It comprises 450 dolls and eighty dolls' houses, and is so arranged as to give an accurate picture of the court and citizen life of the period. Groups of dolls also represent scenes from the working and commercial classes, with every detail of the costumes worn in these days.

Persian Balm—the ideal toilet requisite for every discerning woman. Perfect in results. Creates complexion of rare beauty and charm. Delightfully cool and refreshing. Never leaves a vestige of stickiness. A velvety smooth lotion toning and stimulating the skin. Making it truly rose-leaf in texture. All dainty women invariably choose Persian Balm. It imparts that subtle distinction so characteristic of the elegant woman.

#### Had the Proof

Mother—"Come Bobby, don't be selfish. Let your little brother play with your marbles. Look how he's crying."

Bobby—"But he means to keep them always."

Mother—"Think me, dear."

Bobby—"I tell you he does. He's swallowed two of them already."

### Little Helps For This Week

"And who is thy neighbor?"—Luke x. 29.

O Man, forget not thou, earth's honoured priest!

It's tongue, its soul, its life, its pulse, its heart,

In earth's great chorus to sustain

Chiefest of guests at Love's ungrudging feast,

Play not the niggard, spurn the native clod,

And self disown;

Live to thy neighbor, live unto thy God,

Not to thyself alone.

—S. W. Partridge.

What is meant by our neighbor we cannot doubt; it is everyone with whom we are brought in contact. It is every one who is thrown across our path by the changes and chances of life; he or she, whosoever it be, whom we have any means of helping.

—the unfortunate stranger whom we may meet in travelling, the deserted friend whom no one else cares to look after.—Arthur Penrhyn Stanley.

How near must a person live to me to be my neighbor? Every person is near to you whom you can bless. He is nearest whom you can bless most.

—William Ellery Channing.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

The "fan-shell," a fish nearly two feet long, in some wonderful manner can snap its two halves together in a flash to entrap any wandering fish.

## Here and There

Grain yields ranging from 38 to 70 bushels to the acre are reported in Northern Alberta, according to information reaching the Agricultural Department of the Canadian Pacific Railway.

A tree-planting plan on a large scale to extend over a ten-year period has been inaugurated in Saskatchewan. It will embrace the whole province and is to be started at once.

Establishing a new record for quick delivery, a shipment handled by the Canadian Pacific Express Company went from Southampton to Vancouver in nine days. It came over on the Empress of Britain to Quebec in less than five days.

The Royal York, largest hotel in the British Empire, recently staged the largest bridge tea and fashion show ever held when over 1,000 bridge tables were in operation and nearly 5,000 guests attended the function. It was held in aid of unemployed relief funds.

P. G. Wodehouse, world-famous novelist and humorist, will write his next novel about the Empress of Britain during the winter cruise which starts December 3 from New York. It will be a continuation of the "Jeeves" who has already figured in several of his best sellers.

Butter production in Canada for the first seven months of 1931 increased 25,979,786 pounds, or 15.5 per cent, over the production for the corresponding period of 1930. Exports in the same period were 5,149,000 pounds or nearly 4,000,000 pounds more than in the same seven months last year.

Certainly a seasonal, if not an all time, record for a lady big game hunter was recently established in New Brunswick when Mrs. Walter R. Peterson, of Nashua, New Hampshire, shot a moose, two buck deer and a bear during a hunting trip in the Serpentine section of the Tobique district of the province.

Catfish leather may eventually win favour with the lady of fashion for her handbag or shoes. Not until recently has a market been found for catfish caught in Nova Scotia, but a firm of leather manufacturers in the United States has found that a soft and pliable product can be made from the skins of catfish.

Radio is to be used for promoting correspondence school courses in Saskatchewan. This is believed to be an entirely new departure, though it has already been used as a medium of instruction for a prepared program by the Extension Department of the University of Alberta, for the past few years.

A free scholarship, entitling the holder to one year in Arts and four in engineering or to five years in architecture at the McGill University is offered by the Canadian Pacific Railway Company, subject to competitive examination, to its apprentices and other employees under 21 years of age, and to minor sons of its officers. The candidate receiving highest marks in subjects required for admission to the University will be awarded the scholarship (796).

## JUMPERS BUILT.

Also Bob Sleight, Wagon Boxes, etc. Paul Haller: leave orders at Stony Plain Hardware. 81

**For Sale**—Turkeys, Spring Toms, from Government stock; average weight about 20 lbs.; \$5 apiece. Mrs. Geo. Dickie, phone 205.

At Stony Plain on Fridays, all day

## Stony Plain and District

A party of Stonyites composed of Mr and Mrs Edwin Hoffman and Mr and Mrs O. Hoffman, returned on Friday from a delightful motor trip to Wetaskiwin, where they visited with Mr and Mrs Rudolf Hoffman and family. While in Wetaskiwin the gents of the party encountered a team of horseshoe pitchers, and the Hoffmans won all the prizes and side bets.

Mr and Mrs Max Kast have moved to town for the winter, from their farm at Heatherdown.

Remember the bazar the United Church are holding in the Town hall the afternoon of Saturday next, Nov. 28, opening at 2.30. A turkey supper will also be served.

Radio reception on passenger trains on Canadian National Rys. will be discontinued, it has been announced from railway headquarters. Motives of economy led to the decision.

## Bazar and Sale Home Cooking

The Ladies' Aid of the St. Matthew Church are holding a bazar and sale of home cooking on Sat., Dec 5th, in St. Matthew School house in Stony Plain.

## Calendar

**NOVEMBER**  
27—Walther League Choir's concert.  
28—U.F.A. Local meets.  
28—United Church Bazaar and Supper.

# DE FOREST CROSLEY

## SCORES AGAIN!

### THE "ANNOUNCER TEST"

has proven why more people are buying DE FOREST CROSLEY than any other radio

**UNTIL** a short time ago no absolutely reliable test was available so that anyone could accurately judge radio performance. Then DeForest Crosley introduced the Announcer Test—a simple test that takes the guesswork out of buying a radio. Thousands of people, quick to realize the merits of this plan in helping them select a new radio, bought DeForest Crosley—because the Announcer Test dramatically demonstrated why DeForest Crosley was superior to all other radios.

Come in tonight! Make the Announcer Test on the great Super-Heterodyne "Ballad" and learn why more people are buying DeForest Crosley than any other radio.

## The Super-Heterodyne "Ballad" has proven to be Canada's Greatest Radio Value

Incorporating Autodyne First Detector and Pentode Tube in a newly developed Six Tube Super-Heterodyne Chassis—Complete Range Tone Control—extra speaker terminals—rubber chassis suspension—full size dynamic speaker—the "Ballad" actually gives full eight tube performance and outperforms and outvalues every other radio in this price class.

Hear it and you will be convinced of its startling superiority.

A small down payment will send it home tonight
